Backend Developer

Application Services Sri Lanka

Who You Are:

BlackSwan Technologies is seeking a brilliant and highly motivated Backend Developer to join our rapidly growing team in Sri Lanka. You will be forming task forces to prototype, develop, and deliver native cloud xaaS applications, providing strategic innovative and cost-effective solutions to increase efficiency, reliability and success of BlackSwan Technologies customers. The developer will have a crucial part in contributing to the roadmap of a scalable AI infrastructure with a web interface and will need to master a wide variety of cutting-edge technologies, working in a semi-autonomous environment.
If you are passionate about technology and delivering cutting edge technologies to the world's largest enterprises this job is for you.

What you will be doing:

 Design and develop quality, proficient and well documented technical solutions that satisfy business requirements and meets corporate architectural standards
 Develop solid unit and integration tests according to organizational standards
 Contribute to and drive technological and architectural decisions
 Collaborates with designers, developers and product owners
 Participate in reviewing design and code for other team members
 Adhere to agile development principles while following and improving all aspects of the scrum process
 Function as a subject matter expert in multiple product components
 Assist peer organizations with activities such as performance, scalability and reliability testing
 Applies usability procedures and principles as defined at a project or product-line levels or through customer input
 Contributes to and supports re-use through common components that are well documented and tested

Our Requirements:

 Bachelorâ€™s Degree in Computer Science or equivalent, and 2+ years of experience of solid engineering
 Minimum of 2 years industrial experience in Java / Python and relevant software engineering best practices
 Cloud based development experience will be an added advantage (AWS/GCP/Azure)
 Experience of developing Restful web services and deep understanding on microservices architecture
 Solid knowledge of SQL & NoSQL technologies
 Good communication skills as you will be interacting remotely with counterparts across the world.

Your Profile:

 Ability to learn quickly, and independently in a fast-paced environment
 Excellent time-management, multi-tasking, and communication skills

Superior analytical and problem-solving abilities
