

Frontend Developer

Application Services Sri Lanka

Who You Are:

BlackSwan Technologies is seeking a brilliant, creative and highly motivated FE developer who is passionate about technology, delivering cutting edge technologies to the world largest enterprises.

This person will be part of a team of senior professionals, forming task forces to prototype, develop, and deliver native cloud xaaS applications, providing strategic innovative and cost-effective solutions to increase efficiency, reliability and success of BlackSwan Technologies customers.

The developer will have a crucial part in contributing to the roadmap of a scalable AI infrastructure with a web interface and will need to master a wide variety of cutting-edge technologies, working in a semi-autonomous environment.

I think we are trying to define/focus about product/Marketing of Blackswan, which should not have word with "developer will have crucial part", it draws attention of candidate

Responsibilities:

- Collaborates with designers, developers and product owners
- Design and develop quality, proficient and well documented technical solutions that satisfy business requirements and meets corporate architectural standards
- Develop solid unit and integration tests according to organizational standards
- Contribute to and drive technological and architectural decisions
- Participate in reviewing design and code for other team members
- Adhere to agile development principles while following and improving all aspects of the scrum process
- Function as a subject matter expert in multiple product components
- Assist peer organizations with activities such as performance, scalability and reliability testing
- Applies usability procedures and principles as defined at a project or product-line levels or through customer input
- Contributes to and supports re-use through common components that are well documented and tested
- Past experience with Financial Services will be a benefit

Requirements:

Bachelors or Master's™ degree in computer science, information systems, STEM or related

Technical skills "Must haves":

- 2+ years of development, including delivery of enterprise software
- High proficiency and hands on experience on Angular latest version, AngularJS, JavaScript, HTML 5, CSS3, JSON, Rest API
- Strong Knowledge of security principles
- Experience with continuous integration and continuous delivery
- Knowledge of relational database concepts and experience using MySQL (or similar)

Technical skills “ Strong Plus:

- Experience with Google Cloud Platform and AWS, or other public clouds
- Experience with micro-frontend architecture and popular middlewares
- Experience with TypeScript, Ecma 6, module loaders, web socket
- Experience with Front end optimization (FEO)
