

# Senior IT Project Manager

Operations Poland

## The Opportunity We Offer:Â

We are looking for an IT Project Manager who will support our engagements team in the delivery of cutting-edge, highly scalable enterprise software embedded with knowledge technologies, machine learning, deep learning, NLP, open source intelligence on top of a cloud agnostic, serverless architecture. We are looking for a natural project leader, technology savvy, with a passion to disrupt the digital transformation industry.

Work location: Warsaw/ Poland remote

## Qualifications:

### Must Have:

- At least 3 years of experience working as an IT Project Manager fully responsible for the budget, schedule and clientâ€™s satisfaction in business-critical software development engagements for external clients

- Experience in coordinating project teams and managing IT projects of global scope, in multicultural, international environments

- Proven track record in defining, implementing and executing the standardized ways of project management utilizing best practices from both Agile and traditional frameworks

- Knowledge and understanding of software development and testing methodologies

- Flexibility, adaptability, working experience in a fast pace, agile environment with rapid change of priorities - being willing to tackle any project task required

- Efficiency, confidence and experience working remotely with the client and virtual delivery teams

- Excellent verbal and written communication skills with the ability to interact with technical and non-technical groups

- Fluent English speaker, German will be an advantage

- Problem solver with â€™can doâ€™ attitude

### Nice to Have:

- Business knowledge of Banking, Insurance, Health, Compliance

- Industrial experience in Software Development, DBs, Algorithms, Cloud, Big Data, Machine Learning/Deep Learning

- Scaled Agile frameworks (SAFe, Disciplined Agile Delivery) and traditional project management methodologies (PMI PMP) certification

- Knowledge and hands-on experience on JIRA and Confluence.

## Responsibilities:

- You will take end to end responsibility for projects led for our clients managing them from Presales till Early Life Support and Closure

- You will work with business and technology audiences to establish project priorities appropriately and achieve desired organizational goals and benefits

- You will develop and execute project plans and drive project delivery including scope management, stakeholder management, project team management, meeting milestones,

managing resources, budgets, escalations, changes, project status meetings and communications, reviews, quality assurance procedures - caring about the highest quality of our engagements

You will build solid relationships across the Engagements division and the organization, navigate multiple, interdependent work streams, technical concepts, and conversations across different areas and stakeholders to drive collaboration and consensus

You will work closely with stakeholders and tech teams to resolve any impediments, escalations or delays

You will be responsible for effective implementation of project management methodology / delivery playbook, promoting and enforcing project standards, creating high standards in this area

You will contribute to continuous improvement of the PM framework. Will be a bridge between technical, process and business audiences

#### We Offer:

- A high-impact role in an incredibly fast-paced growth environment
- Possibility to work with all the modern technologies, AI, machine learning
- Opportunity to work with leading global enterprises in multinational teams
- A competitive remuneration package and benefits
- Stable work based on employment contract
- Remote working environment
