- Provides support and maintenance to the product and underlying platform
- Seeks and proposes improvements in the product software and platform

Who We Are:

BlackSwanTechnologies.ai is a uniquely positioned data science and Intelligence insights product company. In our primary application, we offer enterprise level AI empowered Business Applications to data intensive organisations. We are currently building the world's first Cloud AI Operating System (CAIOS) and a Digital Transformation platform (ELEMENT), which, without much fuss, are already serving some of the world's leading financial institutions. Our advantage lies in an unbelievable blend of human assets, science, engineering, and SaaS capabilities that align very well with a starved industry.

To help you succeed, we provide a supportive environment that fosters collaboration between teams and team members, where learning and professional growth is considered a key part of your success, and of ours. We offer a flexible work environment with a family-friendly work-life balance.

We relentlessly solve problems. We win together.
