

DevOps Manager

Development Sri Lanka

BlackSwan Technologies an award winning startup is looking for an experienced hands-on DevOps Manager to lead a team of versatile DevOps Engineers responsible for our Infrastructures, deployment, and CI/CD. BlackSwan Technologies is reinventing enterprise software through Agile Intelligence for the Enterprise – a fusion of data, AI, and cloud technologies that generates billions of dollars in economic value for renowned global brands.

We are a hyper growth startup that is pushing the boundaries on the cloud environment, building the infrastructure for scaling to hundreds and thousands of enterprise customers and cherry picking the best talents for the challenge. Our amazing 100 + team in Sri Lanka is at the epicentre of our journey.

Want to make a big difference? We encourage you to apply!

Responsibilities:

- Lead, train and motivate a large team of highly skilled DevOps engineers
- Build our Infrastructure and DevOps roadmap
- Recruit, build and lead a team of DevOps engineers experts running our cloud infrastructure
- Implement tools and procedures in support of Deployment and CI/CD infrastructure
- Work with software engineers, QA automation engineers, and operations to architect solutions that increase efficiency, scale and reliability across BlackSwan architecture
- Participate in product discussions, influence the roadmap and take ownership and responsibility for new projects to make them happen
- Maintain multiple and consistent environments
- Enforce security principles and practices as needed

Requirements:

- 3+ years in a management position
- 5+ years of experience with DevOps and cloud technologies
- Strong expertise with AWS is required (3+ years), experience with GCP and other cloud technologies is a plus
- Experience with advanced CI/CD processes and techniques
- Experience with containerized environments and microservices (K8s / ECS)
- Experience with logging and monitoring technologies and services
- Experience with programming and scripting languages (Python, Bash)
- A state of mind and approach to automate away from manual efforts
- A strong sense of ownership and accountability
- Strong root cause analysis, debugging and troubleshooting skills
- DevOps culture and working methodology oriented person
- Open minded, highly motivated, interested in implementing new technologies/methodologies and continuous improving of existing tools/infrastructures
- Understanding of computer networks and networks architecture
- Experience building automation processes using Ansible / Terraform
