

Full Stack Team Leader

Development Sri Lanka

Who You Are:

BlackSwan Technologies is seeking a brilliant, creative and highly motivated Full Stack Team Leader to join our growing team in Sri Lanka. This person will form task forces to prototype, develop, and deliver native cloud XaaS applications, providing strategic innovative and cost-effective solutions. The developer will have a crucial part in contributing to the roadmap of a scalable AI infrastructure with a web interface and will need to master a wide variety of cutting-edge technologies, working in a semiautonomous environment.

As a Full Stack Team Leader in BlackSwan Technologies, you will lead a team of talented developers, working in a truly Agile environment where code is deployed several times a day and utilizing cutting-edge technologies.

We believe that our developers should take full ownership of their work: from the initial feature planning phase; choosing the right technologies, designing the code and architecture; coding and all the way to actual deployment in CI/CD environment. We also believe it is the team leader's responsibility to empower their employees and allow them to work independently while helping them to make the right choices and maintaining the highest levels of code quality, helping them to really grow as individuals and uniting them into a cohesive team that works as a unit.

We are looking for a true leader, someone who loves building platform: Whether it's sitting with Product and Design to conceptualize the right product for our clients; Coming up with the best possible architecture and technologies for the specific requirements; managing the work in a truly agile environment; Maintaining the highest levels of production awareness including testing, bug management and postdeployment analysis; And working in collaboration with internal stakeholders as well as other development teams.

Responsibilities:

- Overseeing development and execution of new features
- Mentoring and supporting the personal growth of the engineers in the team
- Lead the team to engineering excellence while building scalable and high-quality software
- Participate in hiring processes for the team and entire R&D
- Supporting production cycle and customer-related issues

Requirements:

- 3+ years as Team Leader, working with Agile methodologies
- 5+ years of proven hands-on experience developing applications platform, both on the server side with (Python or Java) and client side with web frameworks (Angular or React.js)
- Proven track record of hiring and managing high performing engineering teams
- Excellent analytical and interpersonal skills, with the ability to work successfully with engineers, product owners and business stakeholders
- Strong server-side skills
- High standards for code quality, testing, and performance
- B.Sc. in computer science or an equivalent
- Experience in Microservices architecture, cloud and SaaS environments
- Experience and deep understanding of Agile and Lean product development methodologies

Strong background and experience with scalability & performance

Will Be An Advantage:Â

Experience in Python and AWS
