

Senior Java Developer

Development India

Who You Are:

BlackSwan Technologies is seeking a brilliant and highly motivated Senior Java Developer to join our rapidly growing team in India. You will be forming task forces to prototype, develop, and deliver native cloud xaaS applications, providing strategic innovative and cost-effective solutions to increase efficiency, reliability and success of BlackSwan Technologies customers. The developer will have a crucial part in contributing to the roadmap of a scalable AI infrastructure with a web interface and will need to master a wide variety of cutting-edge technologies, working in a semi-autonomous environment.

If you are passionate about technology and delivering cutting edge technologies to the world's largest enterprises this job is for you.

What You Will Be Doing:

- Design and develop quality, proficient and well documented technical solutions that satisfy business requirements and meets corporate architectural standards

- Develop solid unit and integration tests according to organizational standards

- Contribute to and drive technological and architectural decisions

- Collaborates with designers, developers and product owners

- Participate in reviewing design and code for other team members

- Adhere to agile development principles while following and improving all aspects of the scrum process

- Function as a subject matter expert in multiple product components

- Assist peer organizations with activities such as performance, scalability and reliability testing

- Applies usability procedures and principles as defined at a project or product-line levels or through customer input

- Contributes to and supports re-use through common components that are well documented and tested

Our Requirements:Â

- Bachelors or Masterâ€™™ degree in computer science, information systems, STEM or related

- 5+ years of experience in Java development, including integration to enterprise software

- 5 + years of experience in using Java-related frameworks (Spring Framework, Spring Boot, Spring Data, Hibernate, Redis, Spring MVC, Spring Integration)

- 2+ years of experience AWS or other public clouds

- Experience with microservice-based architecture and popular middleware

- Good knowledge of application networking and troubleshooting

- Experience with continuous integration and continuous deliveryâ€™¢Solid knowledge of NoSQL technologies

- Advantage - Familiarity with Agile and Jira

- Advantage- Experience with Microsoft Azure, Google Cloudâ€™¢Advantage

- Knowledge of relational database concepts and experience using MySQL (or similar)

Your Profile:

Ability to learn quickly, and independently in a fast-paced environment
Excellent time-management, multi-tasking, and communication skills
Superior analytical and problem-solving abilities
